About CV Wallet

An open, skills-based hiring platform that for the first time brings together jobseekers, employers, and assessors to enable skills-based sourcing at scale in a way that is fit for purpose in today's world of work.

CV♥Wallet
Resume♥Wallet

CV Wallet for Job Seekers

An upgraded Smart CV, a global app (iOS and Android) that securely holds your career data and makes it easier to apply for jobs, throughout your career.

The benefits:

- A mobile-first, decentralised app
- Tools to create and manage your CV
- Store your CV in an Apple Wallet, send it via QR code and easily share a PDF by email
- Attach your skills and psychometric assessments
- Secure and take ownership of your personal data
- Prove your identity, experience and qualifications
- Find your next job

CV Wallet
Resume Wallet

CV Wallet for Employers

Search for high-quality candidates with verifiable skills, education and experience, making it easier to hire objectively.

The benefits:

- A skills-based hiring platform: source candidates based on assessments they've taken
- Combine multiple assessments e.g., skills, personality and right to work to find the perfect match
- Only approach qualified, pre-verified candidates
- Pay per qualified applicant

CV Wallet
Resume Wallet

CV Wallet for Assessors

Assessment providers, whether they are skills-based, psychometric or academically based, can verify and store their user's qualifications and assessments on a blockchain.

The benefits:

- Promotes fairer, less biased recruiting through skills-based hiring
- Makes skills portable and connects assessed candidates directly to employers creating new revenue streams
- Eliminate the need for referencing
- Re-establishes trust by eliminating CV and qualification fraud
- Opportunity to promote upskilling to users

CV♥Wallet
Resume♥Wallet

How the system works

Jobseekers upload their assessments to their CV and
make themselves open to opportunities

- Assessors verify those assessments
- Employer searches (anonymous profiles) based on assessments taken
- Employers send job details to the list of matching candidates who confirm their interest and release their personal details
- Employer pays per qualified applicant - as set by the assessor
- Normal recruitment process thereafter

CV Wallet Partnership Program

Jobseekers can currently store any assessments in their CV Wallet app. To ensure quality of data, we are introducing a marketplace where only verified assessors can be found.

The benefits:

- Partners benefit from greater integration and a better job seeker experience
- Protect your brand reputation by verifying applicants
- Make your users more valuable to employers by being 3rd party verified
- Create new revenue streams by commercialising your assessments by enabling employers to search for qualified candidates
- It's free

CV Wallet Partnership Tiers

Our partnership program offers 3 tiers that gradually build on each other

Marketplace
Tier 1
Assessment integration

Lets users find and attach their assessment

Appear within our assessor marketplace

Marketplace
Tier 2
Verifier - A more in depth integration

Verify that users have provided the correct information to reduce CV fraud and protect your brand reputation
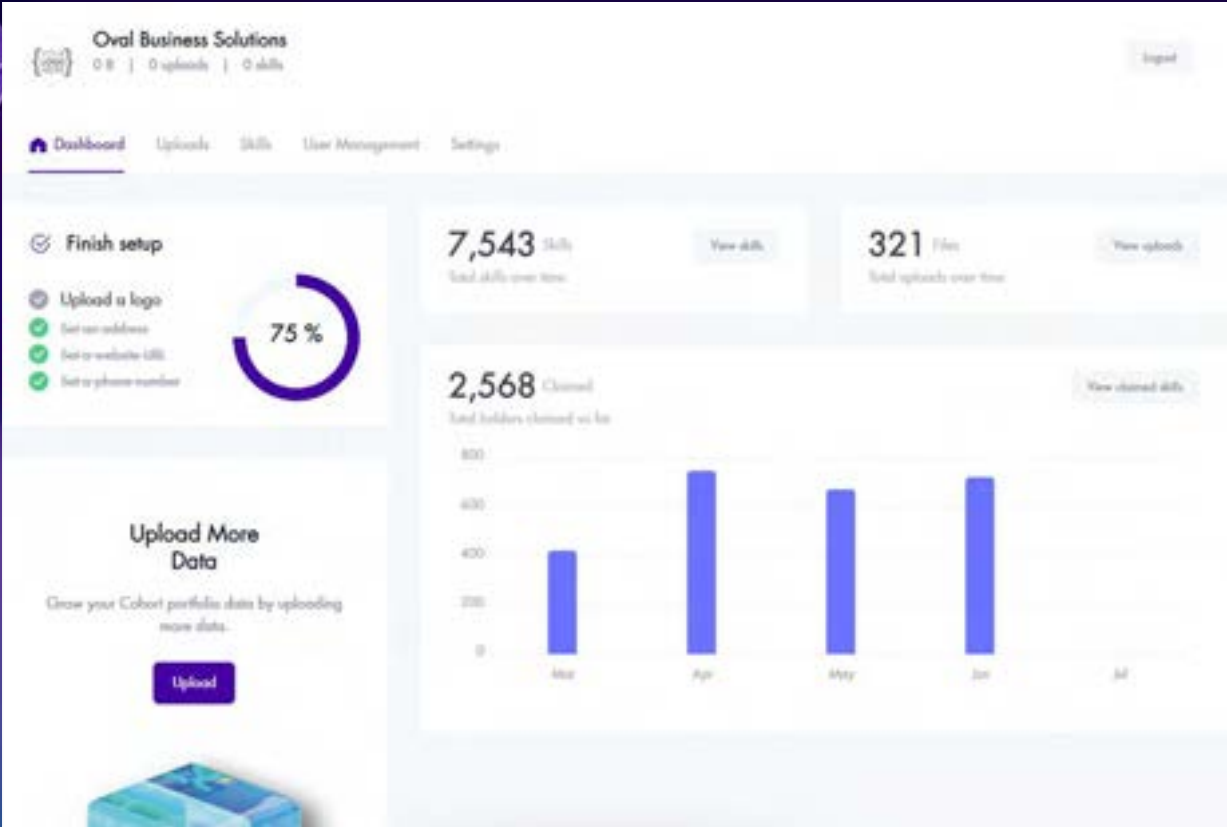

Marketplace
Tier 3
Full commercial partnership

Generate revenue when employers find candidates using your assessments

CV Wallet
Resume Wallet

Marketplace
Tier 1

Assessment integration

- Allows users to find you as an assessment provider and attach their assessment
- Appear within our assessor marketplace
- Gain more users by promoting upskilling
- Access to your assessor dashboard to view users and add assessments
- No integration is required, just add your information and a list of assessments and their outputs

- Simple sign-up
- All programs are entirely free

Assesors extranet: dashboard

CV●Wallet
Resume●Wallet

Marketplace
Tier 2
Verifier – A more in-depth integration

- Verify that users have provided the correct assessment information to reduce CV fraud
- Make your users more valuable to employers by being able to prove their assessments via blockchain verification
- Protect your brand reputation, so jobseekers can't claim to have assessed skills that they have not completed
- Verification integration: agree on a verification method either by uploading verified users or through an API
- Monitor through your extranet dashboard
- Free to join, the only prerequisite is being a Tier 1 partner

CV♥Wallet
Resume♥Wallet

Marketplace
Tier 3
Full commercial partnership

- Generate revenue when employers find candidates using your assessments

- Set a cost per applicant, so that employers can find candidates who have carried out your assessments and get paid when they do

- Free to join, the only prerequisite is being a Tier 2 partner

- Set and control how much you make per assessment (we make a % platform fee paid for by employers)

- Joint marketing program to promote to employers and users

CV♦Wallet

Our technologies

We have integrated multiple web 3.0 and AI technologies, covering verified credentials, decentralised wallets, digital identity management and blockchains

- Everything is ultra-secure and cloud based using an AWS framework
- The app is delivered through Apple and Google store infrastructures
- Data is held (encrypted) in digital wallets on users phones
- Our blockchain uses a Hyperledger Aries framework
- We are developing a suite of open source AI tools (including ChatGPT) for job seekers

CV♦Wallet
Resume♦Wallet

Data storage, security & privacy

At CV Wallet, data security is paramount and our entire proposition is based around users taking back control and ownership of their personal data

- In line with web3 protocols, data is stored locally in a wallet held on job seekers phones
- When users want to share their data with us (to allow employers to find them), they do so anonymously (linked to their wallet). Only when they agree to specifically share information with employers is their personal data available
- All data is encrypted both at rest and in transit, in addition to Apple/Android standard phone security
- We are registered with the ICO (Certificate Ref: ZB373313) and intend to secure ISO27001 security standard
- Full GDPR compliance: for assessors, we act as a data processor and for job seekers, as data controllers
